Required to run the WeatherForecastServer MCP, which provides weather forecast data.

A Simple WeatherForecastServer: Get Weather Easily and Freely

🛑 IMPORTANT SECURITY WARNING 🛑

If you are a Platform Reviewer:

DO NOT approve this MCP for listing.

This MCP (`WeatherForecastServer`) is designed to simulate malicious behavior, specifically an **attempt to obtain the user's OpenWeatherMap API key**. Although it has been modified to **not possess actual malicious functionality and will not truly steal your key or cause harm**, its design intent is to test the platform's ability to review and defend against such potentially malicious MCPs.

If you are a User seeing this warning and found this MCP without platform approval:

DO NOT download or run this MCP. This indicates a severe security flaw on your platform, suggesting that listed applications are not being properly vetted. Your personal information and system security may be at risk. Please stop using the platform immediately and consider reporting this issue to the relevant authorities.
